WORK EXPERIENCE

Wellness Connection

10 2024 - present

Devops Engineer

kolkata, India

- Provisioned and configured scalable AWS infrastructure (EC2, S3, IAM) with Terraform, and integrated it with automated CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time by 60 percent.
- Containerized applications using Docker, deploying to AWS EKS with Helm charts, improving scalability and reliability.
- Implemented Blue-Green Deployment strategy to automate incident response procedures, minimizing downtime and ensuring high availability, which significantly improved platform reliability.
- Handled L1/L2 Incident Management by troubleshooting CI/CD pipeline failures and AWS infra issues, reducing MTTR by 20 percent.

Brane Services Pvt Ltd

07 2023 - 09 2024

Devops Engineer

remote, India

- Established Git-based branching workflows integrated with CI pipelines, reducing merge conflicts by 30 percent and improving collaboration efficiency for a team of 3 developers.
- Contributed to migrating monolithic applications to microservices using Docker and Kubernetes, which streamlined deployment and improved system scalability.

DEVOPS PROJECTS

Scalable, secure, replit hosted using kubernetes 🚀 | AWS, Docker, Kubernetes (EKS), Nix

- Designed and deployed a secure, scalable cloud-native online IDE platform using Kubernetes for dynamic container orchestration.
- Developed an orchestrator service to automate the on-demand provisioning of user-specific coding environments, creating resources (Deployments, Services, Ingress) within the Kubernetes cluster dynamically.

Infrastructure as Code for Multi-Tier Architecture 🚀 | Terraform, AWS (VPC, EC2, RDS, IAM, S3)

- Architected and deployed a highly available 3-tier microservice architecture on AWS EKS using Terraform, implementing secure IAM, autoscaling, and robust monitoring with Prometheus and Grafana for optimized performance and cost efficiency.

GitOps-Based Kubernetes Deployment 🚀 | Kubernetes, GitHub Actions, ArgoCD, Helm, Docker, EKS

- Implemented a GitOps workflow using ArgoCD for Kubernetes deployment automation, resulting in a 20 percent reduction in deployment errors and ensuring consistency through version-controlled Infrastructure as Code (IaC).

EDUCATION

D.Y. Patil College of Engineering

07 2019 – 06 2023

B.E(computer Engineering) - **CGPA - 8.74**

pune, India

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure , GCP

Devops Tools:Jenkins, GitHub Actions, GitLab CI, ArgoCD, Terraform, Helm, SonarQube, Maven, Artifactory,ELK, Azure DevOps, git , github, bitbucket

Infrastructure Automation: Terraform, Ansible **Monitoring Logging:** Prometheus, Grafana, CloudWatch

Scripting Automation: Python, Bash **Language:** c++, DSA **AI tools for devops:** Github copilot, AWS CodeWhisperer, Datadog AIOps

EXTRACURRICULAR

CodeClub

Founding Member

- Conducted weekly sessions on topics such as DSA and OS, reaching an audience of approximately 15 students, promoting continuous online learning during the pandemic.
