📁 [Portfolio](#)

SUMMARY

DevOps & Site Reliability Engineer with 3+ years automating and operating cloud-native infrastructure on AWS. Hands-on with Kubernetes (EKS), Terraform, Ansible, CI/CD (Jenkins, GitHub Actions, GitLab CI), and GitOps (ArgoCD), plus DevSecOps security gates, observability (Prometheus/Grafana), and AIOps tooling. Proven record of cutting deployment time by 60% and MTTR by 20% while improving reliability, security posture, and release velocity across production systems.

WORK EXPERIENCE

Wellness Connection

10 2024 - present

DevOps Engineer

Kolkata, India

- Provisioned scalable AWS infrastructure (EC2, S3, IAM, VPC) with Terraform and integrated it into automated CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time by 60 percent.
- Containerized microservices with Docker and deployed to AWS EKS using Helm charts, with Blue-Green and canary strategies that minimized downtime and ensured high availability.
- Embedded DevSecOps security gates into CI/CD (SonarQube SAST, Trivy container/IaC scanning, and secrets detection), driving critical vulnerabilities reaching production to near-zero and enforcing SLA-driven remediation.
- Built observability with Prometheus, Grafana, and CloudWatch plus SLO-based alerting, and owned L1/L2 incident management, on-call response, and root-cause analysis, reducing MTTR by 20 percent.
- Automated configuration management, OS patching, and environment setup with Ansible and Python/Bash scripts, standardizing infrastructure and reducing manual toil.

Brane Services Pvt Ltd

07 2023 - 09 2024

DevOps Engineer

Remote, India

- Established Git-based branching workflows integrated with CI pipelines, reducing merge conflicts by 30 percent and improving collaboration efficiency for a team of 3 developers.
- Contributed to migrating monolithic applications to microservices using Docker and Kubernetes, which streamlined deployment and improved system scalability.
- Authored reusable Terraform modules and Helm charts and integrated Prometheus/Grafana monitoring with automated alerting, standardizing provisioning and improving visibility into service health.

DEVOPS PROJECTS

Scalable, secure, replit hosted using kubernetes 🚀 | AWS, Docker, Kubernetes (EKS), Nix

- Designed and deployed a secure, scalable cloud-native online IDE platform using Kubernetes for dynamic container orchestration.
- Developed an orchestrator service to automate the on-demand provisioning of user-specific coding environments, creating resources (Deployments, Services, Ingress) within the Kubernetes cluster dynamically.

Infrastructure as Code for Multi-Tier Architecture 🚀 | Terraform, AWS (VPC, EC2, RDS, IAM, S3)

- Architected and deployed a highly available 3-tier microservice architecture on AWS EKS using Terraform, implementing secure IAM, autoscaling, and robust monitoring with Prometheus and Grafana for optimized performance and cost efficiency.

GitOps-Based Kubernetes Deployment 🚀 | Kubernetes, GitHub Actions, ArgoCD, Helm, Docker, EKS

- Implemented a GitOps workflow using ArgoCD for Kubernetes deployment automation, resulting in a 20 percent reduction in deployment errors and ensuring consistency through version-controlled Infrastructure as Code (IaC).

EDUCATION

D.Y. Patil College of Engineering

B.E(computer Engineering) - CGPA - 8.74

07 2019 – 06 2023

pune, India

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, EKS, S3, Lambda, IAM, VPC, RDS, Route53, CloudWatch), Azure, GCP

Containers & Orchestration: Docker, Kubernetes (EKS), Helm, Kustomize

CI/CD & GitOps: Jenkins, GitHub Actions, GitLab CI, Azure DevOps, ArgoCD

Infrastructure as Code: Terraform, Ansible

DevSecOps & Security: SonarQube, Trivy, OWASP, HashiCorp Vault, OPA/Kyverno, IAM Hardening, Vulnerability Management

Monitoring & Observability: Prometheus, Grafana, Loki, ELK, CloudWatch, Datadog

Scripting & Languages: Python, Bash, C++, SQL, DSA

AI / AIOps: GitHub Copilot, AWS CodeWhisperer, Datadog AIOps, LLM-assisted Incident Remediation

OS & Networking: Linux, TCP/IP, HTTP, DNS

Version Control: Git, GitHub, GitLab, Bitbucket

EXTRACURRICULAR

CodeClub

Founding Member

- Conducted weekly sessions on topics such as DSA and OS, reaching an audience of approximately 15 students, promoting continuous online learning during the pandemic.
